Highways and Transportation, you can be assured leading expertise to deliver your car park project.

Clients include major car park operators, airports, hospitals, governments, municipalities, shopping centres and other private developers both in the UK and overseas. We have the extensive knowledge and understanding to make a significant difference to your project.

The company has created several design and construction systems that are now widely used throughout the UK.

With over 35 years of experience in car park consultancy, our team understands every aspect of the design, repair, improvement and alteration of structured and surface car parks. From new developments, to renovations and improvements for existing car parks, we take the time to understand your requirements. Our portfolio ranges from small individual projects to large-scale multi-million pound schemes.

Our innovative, quality-led and cost-

effective approach to car park design blends the engineering discipline, expertise and specialist knowledge required to deliver stunning projects. Combined with our highly effective project management skills, we can, uniquely, manage your project from inception to completion and ensure efficient, operational systems.

By combining the key elements of car park design such as well laid out parking bays, a user-friendly environment, economic design, good access and

traffic flow, with structures that are easy to build yet durable, Hill Cannon has a well-earned reputation for achieving the maximum use of available space.

Highly regarded across the industry, Hill Cannon play an active role in setting new standards for car park design in both the UK and overseas, including the establishment of new European Parking Quality Standards on behalf of the British Parking Association.
